Education

University of California, Santa Barbara Santa Barbara, CA
B.S. Computer Science *Sep 2024 — Dec 2027*

- Cumulative GPA: 3.97/4.0 | Dean's Honors
- Relevant Coursework: Data Structures and Algorithms, Operating Systems, Computer Security, Computer Networking, Databases

Work Experience

Co-Founder & Lead Frontend Developer Feb 2025 — Jun 2026
YearbookPro

- Architected the frontend for an **interactive digital yearbook** using SvelteKit and Tailwind CSS, implementing authentication, responsive interfaces, form validation, and application-wide error handling.
- **Shipped the beta to three schools** and engineered data binding between the admin content management system and the end-user experience.

Projects

Developer, subroutine (subroutine.solunian.dev) Feb 2026 — Present

- Built a **full-stack habit-tracking application** with SvelteKit, TypeScript, and Supabase, supporting entry logging that produces interactive visualizations including historical charts and activity grids.
- Designed a PostgreSQL schema with integrity constraints and Supabase RLS policies to isolate per-user data.

Lead Backend Developer, ACM Poker Bot Tournament (acm-poker-tournament.vercel.app) Jul 2025 — Oct 2025

- Built a **FastAPI/Python backend** for a programming tournament that accepted 20 poker-bot submissions, executed submitted programs server-side, and coordinated their actions through automated poker matches.
- Designed the submission and game-execution pipeline, exposing APIs for administrator and participant workflows and deploying the service to Google Cloud Platform.

Developer, Daniel's Hacker News (solunian.dev/news) Mar 2024

- Built a **responsive Hacker News client** with SvelteKit and TypeScript, concurrently fetching and displaying stories across top, best, and new feeds with pagination and typed API models.
- Designed a polished light/dark interface with mobile-responsive navigation, loading and error states, relative timestamps, and expandable story content.

Technical Skills

- **Languages**: Python, JavaScript/TypeScript, Java, C/C++, SQL, HTML/CSS
- **Frameworks**: Svelte/SvelteKit, React/Next.js, FastAPI, Tailwind CSS
- **Databases, Backend, & Cloud**: PostgreSQL, Supabase, MongoDB, Google Cloud Platform
